Customer: TRELIK Part No.: RNLAxxGxxxxB0E

## 1. Scope:

This specification for approval relates to Resistor Network-SIP RNL Series (Lead Free) manufactured by ROYALOHM 's specifications.

## 2. Type designation:

The type designation shall be in the following form:

(Unit: mm)

Type	L (Max.)	H (Max.)	T (Max.)	C + 0.5 - 0.3	$d \pm 0.1$	f ± 0.2
6 pins	15.3					
7 pins	17.8					
8 pins	20.4	5.08	2.5	3.3	0.5	2.54
9 pins	22.9					
10 pins	25.4					

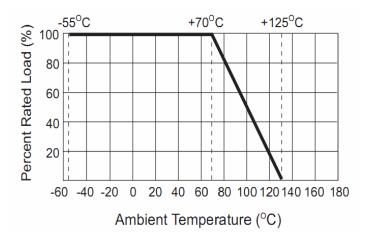

## 3. Rating

Power Rating at 70°C	Max. Working Voltage	Max. Overload Voltage	Dielectric With Standing Voltage	Resistance Range	Resistance Tolerance	Operating Temp. Range
A Type : 0.125 W	100 V	150 V	200 V	$10\Omega\sim 1M\Omega$	2%	-55°C +125°C

## 3.1 Power rating

Resistors shall have a power rating based on continuous load operation at an ambient temperature of 70  $^{\circ}$ C. For temperature in excess of 70  $^{\circ}$ C, The load shall be derate as shown in figure 1.

Figure 1.

## Resistor Network-SIP RNL Series (Lead Free)

## 3.2 Voltage rating:

Resistors shall have a rated direct-current (DC) continuous working voltage or an approximate sine-wave root-mean-square (RMS) alternating-current (AC) continuous working voltage at commercial-line frequency and waveform curresponding to the power rating , as determined from the following formula :

$$RCWV = \sqrt{P \times R}$$

Were: RCWV = Rated DC or RMS AC continuous working voltage at commercial-line frequency and waveform (volt)

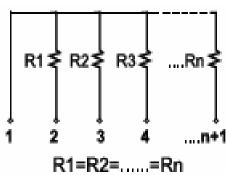

P = Power Rating (watt)

R = Nominal Resistance (ohm)

In no case shall the rated DC or RMS AC continuous working voltage be greater than the applicable maximum value

#### **Environment Related Substance**

This product complies to EU RoHS directive, EU PAHs directive, EU PFOS directive and Halogen free.

Ozone layer depleting substances.

Ozone depleting substances are not used in our manufacturing process of this product.

This product is not manufactured using Chloro fluorocarbons (CFCs), Hydrochlorofluorocarbons (HCFCs),

Hydrobromofluorocarbons (HBFCs) or other ozone depleting substances in any phase of the manufacturing process.

#### **Storage Condition**

The performance of these products, including the solderability, is guaranteed for a year from the date of arrival at your company, provided that they remain packed as they were when delivered and stored at a temperature of  $25^{\circ}\text{C} \pm 5^{\circ}\text{C}$  and a relative humidity of  $60\%\text{RH} \pm 10\%\text{RH}$ 

Even within the above guarantee periods, do not store these products in the following conditions. Otherwise, their electrical performance and/or solderability may be deteriorated, and the packaging materials (e.g. taping materials) may be deformed or deteriorated, resulting in mounting failures.

- 1. In salty air or in air with a high concentration of corrosive gas, such as Cl<sub>2</sub>, H<sub>2</sub>S, NH<sub>3</sub>, SO<sub>2</sub>, or NO<sub>2</sub>
- 2. In direct sunlight
